

Transamerica Intermediate Muni

Class A TAMUX | Class I TIMUX

Investment Objective

The fund seeks to maximize total return through a combination of current income that is exempt from federal income tax and capital appreciation.

Sub-adviser

Belle Haven Investments, L.P. (Belle Haven)

Portfolio Managers

Matthew Dalton
Brian Steeves

Product Profile

An actively managed strategy that seeks to identify inefficiencies throughout the municipal bond market with the goal of maximizing total return primarily through a combination of capital appreciation and current income that is exempt from federal income tax

- ➔ Focus on fundamental credit analysis, security selection, and best execution on transactions
- ➔ An opportunistic approach that gives the fund the flexibility to invest in issuers across the credit and maturity spectrum
- ➔ Tax-advantaged income

Macroeconomic Overview

Municipal fund flows were positive in the second quarter of 2017, though fund flows turned negative in the final week of June. Muni issuance was up 8% month-over-month from May, but down nearly 20% since the same time last year. Illinois was one of the worst-performing states this quarter, not surprisingly after the downgrade in early June and recurrent negative headlines regarding its budget woes. After the June Federal Open Markets Committee meeting, the U.S. Federal Reserve (Fed) raised interest rates by a quarter-point for the second time this year. With additional positive U.S. economic data after the Fed's announcement, Belle Haven saw a sell-off in munis towards the end of the month.

Fund Overview

Transamerica Intermediate Muni outperformed the index for the month of June. Though the fund posted a stronger month than the index, it still is lagging quarter (+2.00% vs. +2.07%) and year to date (+3.74% vs. +3.67%). The fund saw positive performance for most of the month which turned negative in the last week of the quarter as municipal yields rose sharply. The directional shift coincides with the announcement by the European Central Bank regarding the strengthening of the European Union economy and indications of raising rates in the second half of 2017. In continuing the recent fund positioning focus, a majority of the purchases this month were concentrated in the short end of the curve (1-2 year) to maintain a shorter duration and defend against a potential front-end sell-off.

Outlook

Despite weak inflation data, the Fed moved forward with their decision to raise rates, which did not come as a surprise to a majority of the market. The disparity between the data and Fed speak has the market standing on weak knees, and many are unsure of when the next rate hike will be this year, if another one even happens in 2017. In the near- and intermediate-term, munis are positioned to outperform based on current supply and demand technicals. Supply is expected to decrease over the next month, and with July being the second largest month of reinvestment for the year, demand should quench supply. In the high yield space, it has been somewhat difficult to source good opportunities as of late, outside of tobacco, Puerto Rico, and healthcare. Charter schools has been, and will continue to be an area of focus as the sector continues to grow in supply.

Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge of 3.25%. Performance for other share classes will vary.

The gross expense ratios for this fund are 0.78% and 0.59% for Class A and Class I shares, respectively. The net expense ratios for this fund are 0.68% and 0.59% for Class A and Class I shares, respectively. Contractual arrangements have been made with the fund's investment manager, Transamerica Asset Management, Inc. (TAM), through March 1, 2018.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager.

Class I shares are primarily offered for investment to institutional investors including, but not limited to, fee-based programs, qualified retirement plans, certain endowment plans and foundations and Directors, Trustees and employees of the funds' affiliates.

The Bloomberg Barclays Managed Money Intermediate (1-17 Year) Index (Bloomberg Barclays MMI (1-17 Year) Index) is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

Municipal bond prices can rise or fall depending on interest rates. Interest rates may go up, causing the value of the fund's investments to decline. All municipal bonds carry credit risk that the issuer will default or be unable to make timely payments of interest and principal. Generally, lower rated bonds carry more credit risk.

Before investing, consider the fund's investment objective, risks, charges, and expenses. Contact your financial professional or go to transamerica.com for a prospectus and/or summary prospectus with this information. Read it carefully.

Risk Characteristics*

3 years

	Portfolio
Alpha	0.75
Beta	1.11
R-Squared	96.40
Standard Deviation	4.04

*Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on Class A shares at NAV for the 3-year period.

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility.

Average Maturity is computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

Average Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.
