Product Profile

A fund that invests in government and corporate debt securities from emerging markets, seeking to take advantage of promising economic and demographic trends

- ➔ Nearly 40 investment professionals seeking global credit opportunities across credit spectrums
- ➔ Invests in U.S. dollar and local currency debt; active currency-hedging program helps temper volatility
- ➔ Purchases emerging market government and corporate debt, investment grade and below-investment grade

30-Day SEC Yield

Class A – Subsidized	4.57%
Class A – Unsubsidized	4.57%

Risk Measures

3 years

Alpha	0.40
Beta	1.15
Information Ratio	0.37
R-Squared	83.50
Sharpe Ratio	0.85
Standard Deviation	7.10
Tracking Error	2.99

Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on Class A shares at NAV for the 3-year period.

Fixed Income Statistics

Average Price	\$97.91
Average Maturity	9.61 years
Average Duration	4.98 years

Average Maturity is computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures. Average Duration is a time measure of a bond's interest rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

U.S. Equity	0.04

U.S. allocations may include U.S. territories and possessions.

Growth of a \$10,000 Investment

Class A without sales charge 08/31/11 to 03/31/18

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund on commencement of operations. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

The Net Other Assets (Liabilities) category may include, but is not limited to, repurchase agreements, reverse repurchase agreements, security lending collateral, forward foreign currency contracts, and cash collateral.

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **Information Ratio** is a ratio of portfolio returns above those of a benchmark compared to the volatility of those returns. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility. **Tracking Error** is the difference between the price behavior of a fund and the price behavior of a benchmark.

The **30 day SEC Yield** is computed in accordance with a standardized method prescribed by rules of the SEC. The 30 day SEC Yield is computed by dividing the fund's investment income per share earned during a particular 30 day base period by the maximum offering price per share on the last day of the base period, and then annualizing the result. The 30 day SEC Yield is calculated at each month end and updated within the first ten business days of the following month. The subsidized 30 day SEC yield reflects the reimbursements or waivers of certain expenses. Had fees not been waived and/or expenses reimbursed, the yield would be lower. The unsubsidized 30 day SEC yield does not reflect reimbursements or waivers of expense fees.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager.

The performance data presented represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost.

Credit quality display reflects S&P® ratings; percentages may include investments not rated by S&P® but rated by Moody's®, or if unrated by Moody's®, by Fitch® ratings, and then included in the closest equivalent S&P® rating. NR includes securities that are not rated by S&P®, Moody's®, or Fitch®, but may be rated by other Nationally Recognized Statistical Rating Organizations, and may contain bonds, equities and/or bank loans.

The Other category includes all Net Assets except U.S. and International Fixed Income.

Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge of 4.75%. Performance for other share classes will vary.

The gross expense ratios for this fund are 1.12%, 1.87%, 0.82%, and 0.96% for Class A, C, I, and TI shares, respectively. The net expense ratios for this fund are 1.12%, 1.87%, 0.82%, and 0.96% for Class A, C, I, and TI shares, respectively. Contractual arrangements (if applicable) have been made with the fund's investment manager, Transamerica Asset Management, Inc. (TAM), through March 1, 2019.

The J.P. Morgan Emerging Markets Bond Index Global (JPM EM Bond Index Global) is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

The risks of investing in foreign securities are magnified in emerging markets. These may include risks related to market and currency volatility, adverse social and political developments, and the relatively small size and less liquidity of these markets. Debt investing is subject to credit risk and interest rate risk. Credit risk is the risk that the issuer of a bond won't meet their payments and interest rate risk is the risk that fluctuations in interest rates will affect the price of a bond.

Shares may be sold (or "redeemed") on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within three business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law.

Mutual funds are subject to market risk, including the loss of principal. Past performance is not indicative of future results.

Mutual Funds are sold by prospectus. Before investing, consider the funds' investment objectives, risks, charges, and expenses. This and other important information is contained in the prospectus. Please go to www.transamerica.com or contact your financial professional to obtain a prospectus or, if available, a summary prospectus containing this information. Please read it carefully before investing.
