Growth of a \$10,000 Investment

Class A without sales charge 03/01/06 to 12/31/18

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund on commencement of operations. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **Information Ratio** is a ratio of portfolio returns above those of a benchmark compared to the volatility of those returns. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility. **Tracking Error** is the difference between the price behavior of a fund and the price behavior of a benchmark.

The Net Other Assets (Liabilities) category may include, but is not limited to, repurchase agreements, reverse repurchase agreements, security lending collateral, forward foreign currency contracts, and cash collateral.

There are no sales charges on Class I. Class I shares are primarily offered for investment to institutional investors including, but not limited to, fee-based programs, pension plans, and certain endowment plans and foundations.

Not insured by FDIC or any federal government agency. May lose value. Not a deposit or guaranteed by any bank, bank affiliate, or credit union.

The performance data presented represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost.

Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge of 5.50%. Performance for other share classes will vary.

The gross expense ratios for this fund are 1.50%, 2.22%, and 1.15% for Class A, C, and I shares, respectively. The net expense ratios for this fund are 1.36%, 2.11%, and 1.11% for Class A, C, and I shares, respectively. Contractual arrangements (if applicable) have been made with the fund's investment manager, Transamerica Asset Management, Inc. (TAM), through March 1, 2019.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager.

The MSCI All Country World Index Net is an unmanaged index used as a general measure of global equity market performance. MSCI World Index ex-U.S. measures the performance of stock markets in 22 countries outside of the U.S. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions. If the market prices of the equity securities owned by the fund fall, the value of the fund will decline. Investments in global/international markets involve risks not associated with U.S. markets, such as currency fluctuations, adverse social and political developments, and the relatively small size and lesser liquidity of the markets. Investments in developing markets involve greater risks than investments in developed markets.

Shares may be sold (or "redeemed") on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within three business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law.

Mutual funds are subject to market risk, including the loss of principal. Past performance is not indicative of future results.

Mutual Funds are sold by prospectus. Before investing, consider the funds' investment objectives, risks, charges, and expenses. This and other important information is contained in the prospectus. Please go to www.transamerica.com or contact your financial professional to obtain a prospectus or, if available, a summary prospectus containing this information. Please read it carefully before investing.
