

# Transamerica Intermediate Muni

Class A TAMUX | Class I TIMUX

## Investment Objective

The fund seeks to maximize total return through a combination of current income that is exempt from federal income tax and capital appreciation.

## Sub-adviser

Belle Haven Investments, L.P. (Belle Haven)

## Portfolio Managers

Matthew Dalton  
Brian Steeves

## Product Profile

An actively managed strategy that seeks to identify inefficiencies throughout the municipal bond market with the goal of maximizing total return primarily through a combination of capital appreciation and current income that is exempt from federal income tax

- ➔ Focus on fundamental credit analysis, security selection, and best execution on transactions
- ➔ An opportunistic approach that gives the fund the flexibility to invest in issuers across the credit and maturity spectrum
- ➔ Tax-advantaged income

## Fund Facts

Inception Date (A-I)	10/31/12 - 10/31/12
Benchmark Index	Bloomberg Barclays Muni Managed Money Intermediate Index
Morningstar Category	Muni National Intermediate
Lipper Category	Intermediate Municipal Debt
Dividend Frequency	Monthly

## Macroeconomic Overview

The yield curve continued its flattening trend throughout the quarter, especially towards the end of the quarter as the market began to price in a September U.S. Federal Reserve (Fed) rate hike. The Fed followed through on market expectations, and raised the federal funds rate by 0.25%. The yield on the 10 Year U.S. Treasury neared its year-to-date high (3.11% in mid-May), topping out at 3.10% towards the end of September. Once again this year, municipal issuance was down, and heavy redemptions in July and August helped support municipal performance in those months. Municipal fund inflows were positive for most of the quarter, though high yield municipal flows turned negative in the last week of September.

## Fund Overview

Transamerica Intermediate Muni returned -0.03% for the quarter, outperforming its benchmark, the Bloomberg Barclays Municipal Managed Money Intermediate Index, which returned -0.22%. The Fund's credit rating allocation was the largest contributor to performance this quarter. The Fund's overweight allocation to A rated credits relative to the index was a main contributor to outperformance, as lower-grade credits outperformed this quarter. Though the Fund carried a slightly longer duration than the index, its overweight allocation to 0-1 year duration contributed to relative performance. At the sector-level, the Fund's overweight exposure to housing bonds was a slight detractor to performance.

## Outlook

Contrary to the positive technical backdrop of the municipal market during the summer, the fall months are historically low-redemption periods, which may result in net positive supply and thus put pressure on the municipal market in the near-term. The long end of the yield curve appears cheap; however, the absence of bank participation and investor trepidations about extending portfolio durations may pose a hindrance for the long end to outperform. After the September Fed meeting, probability of another rate hike in December increased to over 70%, according to Fed fund futures. Though the Fed continues to view the economy as strong, there are still latent concerns regarding the impact of the ongoing trade wars and unpredictable geopolitical events.

## 30-Day SEC Yield

Class A – Subsidized	<b>2.26%</b>
Class A – Unsubsidized	<b>2.16%</b>

The **30-Day SEC Yield** is computed in accordance with a standardized method prescribed by rules of the SEC. The 30-Day SEC Yield is computed by dividing the fund's investment income per share earned during a particular 30-day base period by the maximum offering price per share on the last day of the base period, and then annualizing the result. The 30-Day SEC Yield is calculated at each month end and updated within the first ten business days of the following month. Be advised that the 30-Day SEC Yield calculation does not account for return of capital. Please refer to the most recent Annual Report for additional information regarding the composition of distributions. The subsidized 30-Day SEC Yield reflects the reimbursements or waivers of certain expenses. Had fees not been waived and/or expenses reimbursed, the yield would be lower. The unsubsidized 30-Day SEC Yield does not reflect reimbursements or waivers of expense fees.

**The performance data presented represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost.**

**Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge of 3.25%. Performance for other share classes will vary.**

**The gross expense ratios for this fund are 0.78% and 0.59% for Class A and Class I shares, respectively. The net expense ratios for this fund are 0.68% and 0.59% for Class A and Class I shares, respectively. Contractual arrangements (if applicable) have been made with the fund's investment manager, Transamerica Asset Management, Inc. (TAM), through March 1, 2019.**

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager.

The Bloomberg Barclays Muni Managed Money Intermediate Index (Bloomberg Barclays MMMI Index) is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

Municipal bond prices can rise or fall depending on interest rates. Interest rates may go up, causing the value of the fund's investments to decline. All municipal bonds carry credit risk that the issuer will default or be unable to make timely payments of interest and principal. Generally, lower rated bonds carry more credit risk.

**Mutual funds are subject to market risk, including the loss of principal. Past performance is not indicative of future results.**
